Detailed Action

Response to Amendment

- The reply filed on December 29, 2005 was applied to the following effect: The Applicant presented arguments are persuasive.

Claim Rejections - 35 USC § 102

1. All relevant rejections have been withdrawn as being satisfied.

Reasons for Allowance

2. Claims 1-20 are allowed.
3. The following is an examiner's statement of reasons for allowance:

This application is for an optical pickup actuator.

- **Claims 1,3,12,14, and 17** specify an optical pickup actuator, which requires:

"...a second magnet installed outside the cavity so as to at least partially face the first magnet, so that a portion of the coil is positioned between the first magnet and the second magnet, wherein an outer surface of the first magnet facing the coil is polarized into a first pole and an inner surface of the first magnet is polarized into a second pole."

These features, in combination with the other features of Claims 1,3,12,14, and 17, are not anticipated by, nor made obvious over, the prior art of record.

- **Claims 7 and 19** specify an optical pickup actuator, which requires:

"...generating a plurality of forces from the flow of current, wherein each of the plurality of forces is generated in substantially the same direction as a main moving force to move a blade and moving the blade of the optical pickup actuator with the plurality of generated forces."

These features, in combination with the other features of Claims 7 and 19, are not anticipated by, nor made obvious over, the prior art of record.
